

Finnish Parliament

By integrating environmental considerations in its public procurement systems, the parliament achieved the following results:

100% of the electricity is produced with renewable forms of production

40% of the district heat energy procured for Parliament's properties produced with renewable fuels.

Cleaning services with ecologically sustainable products

Environmentally-friendly catering (cultivation, production, transportation, etc.)

All paper is to be recycled

This document is part of a series presented at the Conference organised by the INTER PARES programme on 11-12 May 2021, to share good initiatives introduced by parliaments to tackle climate change challenges.

The examples cited in this document were kindly shared by the parliament and edited for presentation by the INTER PARES programme.
